ACKNOWLEDGMENT

This project consumed huge amount of work and dedication. Still, implementation would not have been possible if we did not have a support of many individuals. Therefore we would like to extend our sincere gratitude to all of them.

First of all we are thankful to Ms Le Mong Thuy for providing necessary guidance concerning projects implementation as well as her provision of expertise. Without her superior knowledge and experience, the Project could not have been successful. We also would like to express our sincere thanks towards the members of the team who devoted their time and knowledge in the implementation of this project.

Finally, we express our gratitude toward our families and colleagues for their kind co-operation and encouragement which help us in completion of this project.

SYNOPSIS

Incredible Bridges is a website which provides information about various famous bridges around the world.

Incredible Bridges offers users the opportunity to learn more about World Bridges. All of the information is well organized and put into categories so it is very easy to search for and not time-consuming.

Incredible Bridges also allows its users to share their ideas with other people who have the same interest or even with the admin. Moreover, usefull information about buses and flights to reach the places is provided as well.

PROBLEM STATEMENT

The Web site is to be created based on the following requirements.

- 1) The Top of the Page should be presented with a suitable logo and various images of famous bridges.
- 2) Site should have sections as Historical Great Bridges, High-Level Achievements in Bridges, Iconic Bridges, and Modern Great Bridges etc.
 - Various bridges should be listed in these sections accordingly
- 3) Sections like Longest, Tallest, Highest, Oldest etc. to be added to the website.
- 4) History and information of the bridges should be added along with the images.
- 5) The site must contain the filter based on Continents to look for various bridges in the continent
- 6) Gallery can be added for viewing different images.
- 7) Feedback must be allowed to enter by the viewer.
- 8) Site map, Gallery, About us, FAQ link, Contact us link must be added.
- 9) About Us and Contact Us: This menu option should display Email id, address, and contact number of the organization who is developing the system.
- 10) The advertise section of bus, flights can be included for reaching the places.

CUSTOMER'S REQUIREMENTS SPECIFICATIONS (CRS)

Website: Incredible Bridges

Business/Project Objective:

- Provide users interesting information about famous bridges around the world.
- Enable users to search for their favorite one through its name
- Help users to identify bridges location and find ways to reach there.

Input to the system:

- Feedback from visitor.

Output from the system:

- Detailed information about the bridges as well as illustrated pictures
- Display location of the bridges and provide information about buses and flight to reach the places
- Display a visitor count.

Process:

- Validate data input from users.

Expected delivery date: 19-September-2022.

List of deliverables:

- Document Word, PDF.
- Source code.

Hardware/ Software Requirements:

Hardware

- Intel Core i3/i5 Processor or higher
- 8 GB RAM or above
- Color SVGA
- 500 GB Hard Disk space
- Mouse
- Keyboard

Software

Technologies to be used:

- Frontend: HTML5, CSS, Bootstrap, JavaScript, jQuery, AngularJS.
- Data Store: JSON files

Other Requirements:

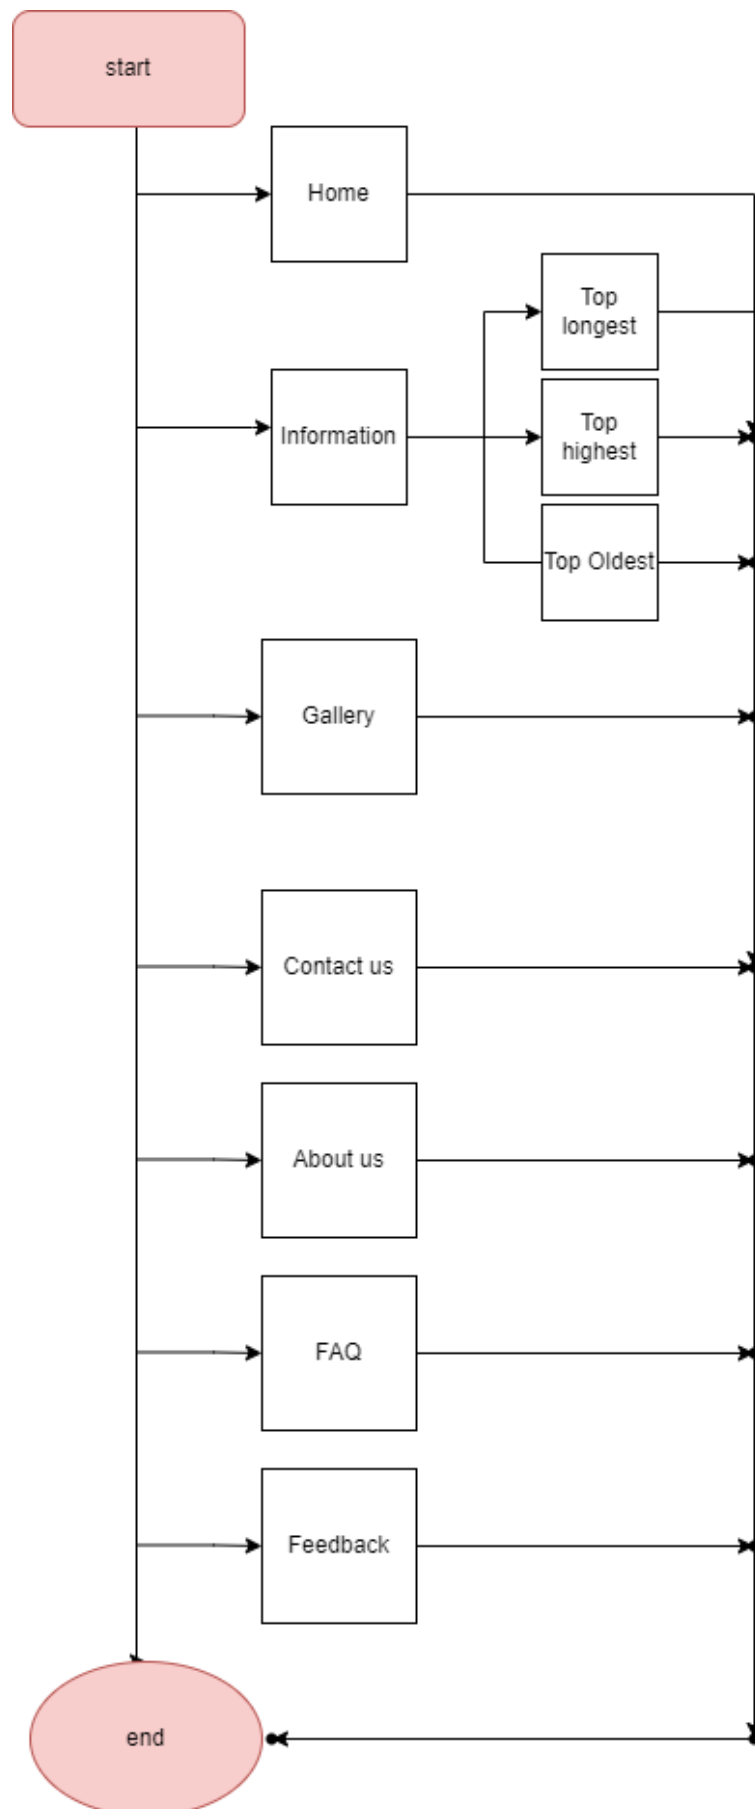

- Operating Portal: Windows
- Browsers: Edge, Chrome, Mozilla Firefox, Safari

SCOPE OF THE WORK (IN BRIEF)

After a long and detailed discussion, our group has decided to create a website contain the following webpages:

1. **Homepage:** There is a menu bar to display 7 categories: Home, Brigdes (Historical, Iconic and Modern), Gallery, Contact us, About us, FAQ and Sign up
2. Each Bridge webpage will show 5 brigdes
3. **Gallery:** Displays all picture of website
4. **About Us:** Display the information of the company
5. **Contact Us:** Display the address of the company, Map and allow customers to request any information
6. **FAQ:** Display some common question and answer.
7. **Feedback:** Allow users send feedback and comment to the company.

ARCHITECTURE AND DESIGN OF THE SYSTEM

The Brooklyn Bridge

Information
Year
1883

Highest
41m

Longest
1,825 m

Location
New york(USA)

Continent
North Americas

History

The Brooklyn Bridge
is a hybrid cable-stayed/suspension bridge in New York City, spanning the East River between the boroughs of Manhattan and Brooklyn. Opened on May 24, 1883, the Brooklyn Bridge was the first fixed crossing of the East River. It was also the longest suspension bridge in the world at the time of its opening, with a main span of 1,595.5 feet (486.3 m) and a deck 127 ft (38.7 m) above mean high water. The span was originally called the New York and Brooklyn Bridge or the East River Bridge but was officially renamed the Brooklyn Bridge in 1915.

Description
The Brooklyn Bridge, an early example of a steel-wire suspension bridge, uses a hybrid cable-stayed/suspension bridge design, with both vertical and diagonal suspender cables. Its stone towers are neo-Gothic, with characteristic pointed arches. The New York City Department of Transportation (NYCDOT), which maintains the bridge, says that its original paint scheme was "Brooklyn Bridge Tan" and "Silver", although a writer for The New York Post states that it was originally entirely "Rawlins Red".

Construction
of the Brooklyn Bridge began on January 2, 1870. The first work entailed the construction of two caissons, upon which the suspension towers would be built. The Brooklyn side's caisson was built at the Webb & Bell shipyard in Greenpoint, Brooklyn, and was launched into the river on March 19, 1870. Compressed air was pumped into the caisson, and workers entered the space to dig the sediment until it sank to the bedrock. As one sixteen-year-old from Ireland.
